

Integral's newest addition to our law enforcement team...

# ★ Ranger 50/50 ★

Canadian Tire, Scarborough, Ontario, December 2010

Canadian Tire, Kanata, Ontario, December 2010

two way access control

### It works as follows:

★ 1 Free access into the store

★ 2 Exit from the store in one of the following modes:

- ★ a With permission, i.e. the exiting consumer pushes the blue call button. A store attendant then pushes a wireless button (located at the cash or on a key chain) which advises the consumer that the gate is open to exit
- ★ b The consumer presents themselves at the gate to exit. The consumer is advised to wait, typically for 5 seconds (enough for a store attendant to turn around and look at the exiting consumer, then the consumer is advised that they are free to exit
- ★ c Free un-restricted exit
