Integral

Integral Lane Gate P/N- LG56

Integral is proud to announce the addition of its new lane closure system to its family of unique and innovative retail security products. The LG56, a retractable lane gate system is designed to provide a substantial deterrent to shop lifters attempting to walk through unattended lanes, at wide opening such as in a mall application, while at the same time providing an ease of use for store employees. This product also can provide marketing content opportunities on either one or sides on the column.

Key features and benefits:

- Retrofitable to most store fronts
- Large image surface, 20.375" x 56" x .062
- Able to accommodate variable lane widths, from 22" to 36"
- Robust steel design and construction with sleek exterior
- Lockable in the lane closed position
- Dampened and counter balanced to work with minimal force, up or down
- Easy installation with floor anchors
