

The New DEPUTY

Locks automatically when individuals try to exit through your store entrance

Customers experience a pleasant, greeter's voice upon entrance (optional)

NEW - Sentry light column, repositioned forward to improve visual alerts for both staff and customers

NEW - "Reach over" sensor, repositioned for superior performance

NEW - Available with new "Fall-away" option

NEW - Improved speaker system for crystal clear audio notifications

Integrated railing system:
Thieves hand-off unpaid merchandise through your un-protected entrance, the optional integrated railing system adds another deterrent to shoplifters. Keep your in-store traffic away from potential accomplices on the outside.

NEW - "Floor level" negative movement detection sensors

DO YOU KNOW HOW MUCH MERCHANDISE YOU'VE LOST THIS YEAR TO ORGANIZED RETAIL CRIME?

Fact: Professional shoplifters, retail crime rings and petty thieves; they're all targeting your stores

Fact: Thieves are exiting through your unprotected entrance with unpaid merchandise

Fact: You have limited manpower and resources to supervise the store entrance

Fact: Your competition's entrance is protected and yours is not...now you become the target

FOR YOUR "PEACE OF MIND", THERE'S A NEW DEPUTY IN TOWN!

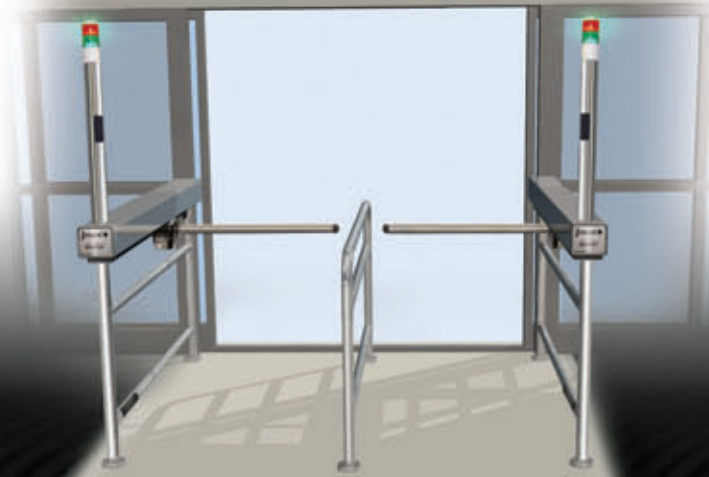

The "improved" Deputy is the new standard in single-arm entrance security gates. When combined with Integral's iRail - Retail Traffic Queuing Solution, it becomes an innovative security system, designed to welcome and direct "incoming" customer traffic and lets you focus on selling your products and serving your customers.

Engineered to withstand the rigors of high-traffic applications, Integral security gates and iRail systems are more effective than ordinary turnstiles.

- Compact footprint saves valuable store "real estate" by reducing the amount of floor space devoted to bulky, turnstiles and out-dated railing corrals
- They allow wheelchair, electric cart and baby carriage access through a single entrance lane, unlike traditional turnstiles that prevent non-ambulatory customers from entering the store
- They feature a pleasant, customizable greeter's voice when consumers enter the store (optional)
- Built-in system intelligence (with manager override), blocks all attempts to exit through the entrance
- Durable stainless steel construction is easy to clean and maintain

SG-1050-D

Deputy single arm security gate system (left and right)

AN "INNOVATIVE" NEW STANDARD IN RETAIL SECURITY! NOT JUST A SUPERIOR GATE SYSTEM, BUT A VIRTUAL ELECTRONIC SECURITY GUARD FOR YOUR ENTRANCE

The "new and improved" Deputy permits entry into the store normally, but, when a shoplifter attempts to exit the store through the entrance gate, it locks automatically, providing audible and visual alerts.

Here's how:

- The security arm of the gate is instantly locked
- An audible recorded voice-track tells the offender to turn around
- A flashing red light (attached to the security gate) is activated, serving as a visual alert for employees
- The arm is equipped with a tightening ratchet so that when the alarm is activated the gate will not only lock into position, but will continue to tighten with each subsequent push or pull.

With enhanced security features, The Deputy SG-1050. takes your retail entrance security to a whole new level:

- New "floor level" negative movement detection sensor. i.e.: someone attempting to slide a case of beer out through the entrance activates the Deputy
- New "reach over" sensor, i.e.: someone reaches over, at shoulder level, attempting to pass something off to an accomplice activates the Deputy
- Improved speaker, repositioned for superior auditory performance
- Sentry light column, repositioned to improve visual notifications for both staff and customers
- Improved software functionality for better security and safety
- Improved speaker system for crystal clear audio notifications
- Now, available with new "Fall-away" option

The "new and improved" Deputy:

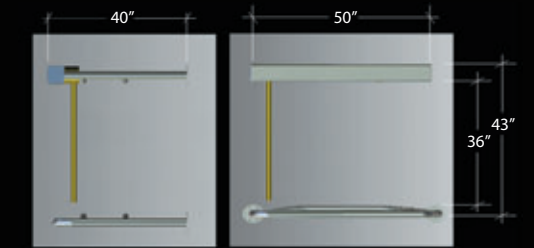

- Easily integrates with pivoting and sliding door entrance configurations
- Secures entrance, freeing up employees to focus on operational duties
- Secure management mode permits controlled exit, only by authorized staff

Metro Marche Boucher, Berthierville, November 2009

Specifications:

- 36" corral
- 110 VAC 15 amp circuit
- Maximum holding force: 180 pounds at 18 inches
- Stainless steel exterior
- Highly resistant powder-coated steel interior
- CSA approved
- Dry contacts to receive fire panel signal
- Horizontal bar at 32" from floor make it ideal to accommodate most grocery carriages (verification suggested)
